THEORY OF WEAR. Pt. 1 of Wear-Resistance of Cotton and Linen Fabrics. [1961] 26p.
Order from SLA $2.60
61-14974

Trans. of [Institut Textile de France]. Bulletin, 1958, no. 75 [p. 7-25].

DESCRIPTORS: *Cotton textiles, *Textiles, Textile industry, Mechanical properties, Chemical properties, Fibers, Deformation.

From a qualitative point of view, the theory outlined makes it possible to characterize the mechanical behavior of a fabric from the mean load-stretch curve of its fibers, and from the mean deformation imposed on them by the construction of the fabric. It thereby permits us to define purely mechanical wear as the loss of mechanical resistance with no appreciable variation in the load-stretch curve, and purely chemical wear as the loss of mechanical resistance resulting from the
